

Veterinary Gastric Supplement

An equine nutritional supplement suitable for feeding to horses displaying signs of gastric ulcers.

A unique supplement for daily feeding to horses prone to gastric disturbances. Veterinary Gastric Supplement will assist in maintaining optimum gut health and function, allowing maximum utilisation of feed. Veterinary Gastric Supplement supplies a unique formulation of prebiotics, amino acids, seaweed extract and specific minerals necessary to aid in the recovery and maintenance of a healthy digestive tract. It is supplied in a convenient pelleted formulation.
