

Haemo Tonic

A palatable Iron, B-Complex and Cobalt enriched syrup on a Sorbitol base.

A premium Iron Enriched B vitamin syrup. It also contains Sorbitol, which enhances the serum concentrations that result from the oral administration of Vitamin B12. Competition horses need dietary supplementation of B complex vitamins and Iron, as these nutrients are needed for red blood cell formation and important metabolic functions relating to exercise. Haemo Tonic will supply these nutrients to fortify and strengthen performance horses, which will ensure that their full athletic potential is expressed in competition. It can be used to support post viral recovery.

Presentation 1.2ltr

Feed Materials Sorbitol, Water.

Analysis
 Moisture 58.5%
 Crude Protein 1.26%
 Ash 0.4%
 Total Fat <0.5%
 Crude Fibre 0.1%
